</table>
| 1     | Non-functional          | - Unable to ambulate  
- Ambulates only in parallel bars  
- Requires supervision or physical assistance from > 1 person |
| 2     | Dependent, Level II     | - Requires manual contact of one person during ambulation on level surfaces  
- Manual contact is continuous and necessary to support body weight and/or to maintain balance or assist coordination |
| 3     | Dependent, Level I      | - Requires manual contact of one person during ambulation on level surfaces  
- Manual contact is continuous or intermittent light touch to assist balance or coordination |
| 4     | Dependent, Supervision  | - Ambulation occurs on level surfaces without manual contact of another person  
- Requires stand-by guarding of one person because of poor judgment, questionable cardiac status, or the need for verbal cuing to complete the task |
| 5     | Independent, Level Surfaces Only | - Ambulate is independent on level surfaces  
- Requires supervision/physical assistance to negotiate stairs, inclines, or unlevel surfaces |
| 6     | Independent, Level and Non-Level Surfaces | - Ambulation is independent on unlevel and level surfaces, stairs, and inclines |
